

# Mosaicking in ERDAS IMAGINE® and LPS

**Easily Create Seamless Image Mosaics Using the MosaicPro Tool**  
MosaicPro enables users to create mosaics ranging from the very simple to the highly sophisticated.

The MosaicPro tool in IMAGINE Advantage and LPS creates and fine-tunes large mosaics that may include thousands of images. Offering dynamic update visualization, MosaicPro efficiently facilitates the seam editing process. MosaicPro's radiometric adjustment capabilities ensure close-to-reality, uniform mosaics for the photogrammetric, remote sensing and GIS communities.

### Flexible Product Generation Options

The MosaicPro tool in ERDAS IMAGINE and LPS can create high-quality mosaics according to any number of specifications.

## Mosaicking in ERDAS IMAGINE and LPS

### Streamlined Mosaic Editing Process

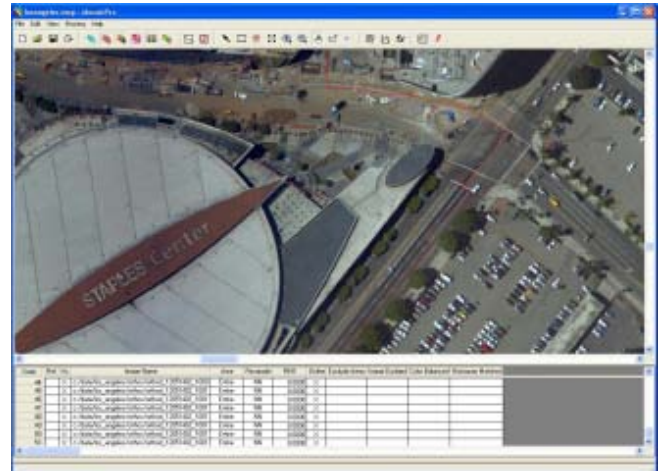

MosaicPro streamlines the editing process with various capabilities, allowing the user to select images directly, control which input images are rendered and turn image footprints and other graphics on and off. The user interface of MosaicPro also simplifies the workflow with tools available in a single, easy-to-use toolbar.

### Dynamic Editing Process

MosaicPro revolutionizes the seam editing user experience, by immediately updating the image when a seam is modified. Delivering a “what you see is what you get” (WYSIWYG) editing experience, MosaicPro greatly facilitates the fine-tuning of mosaics that include human artifacts like dense urban areas.

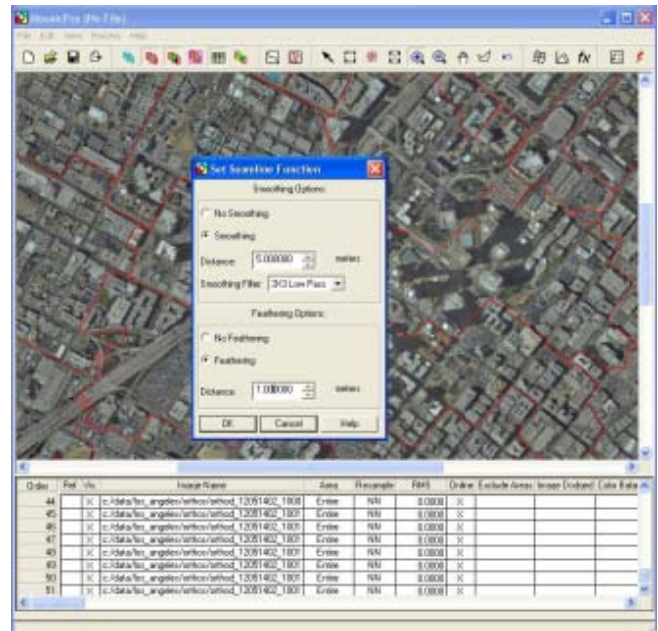

### Intuitive Production Mapping Product

MosaicPro is a high-capacity, threaded and efficient mosaicking engine. It does not blow out your RAM, and touches the hard disk the fewest times possible. The robust set for radiometric adjustment, seamline editing, and batch processing capabilities meet the needs of the high productivity requirements of the production mapping industry. The user interface means this production mapping industry product can be used by everyone.

#### A Streamlined Seam Editing Process

MosaicPro's seam editing functions provide a “what you see is what you get” approach to mosaicking, providing a dynamically updating view during the editing process.

#### Creating Seamless Image Mosaics

Options such as seam smoothing and feathering help create seamless imagery mosaics.
